

Almir Kazaferovic

Junior Software Developer

Queens, NY | 347-861-3650 | almir1293@hotmail.com | almirkazafer.com

PROFILE SUMMARY

Innovative and dedicated Junior Software Developer with hands-on experience in all phases of software development. Knowledgeable in requirement gathering, application design, development, configuration, testing, and support of next generation software applications. Equipped with a strong attention to detail, time management skills, and ability to learn new technology quickly and function as an excellent team player. Seeking internship position in a fast paced tech environment where I can utilize my well-honed skills in software programming and continue to learn from team experienced professionals.

EDUCATION

NEW YORK INSTITUTE OF TECHNOLOGY

Bachelor of Science in Computer Science

Manhattan, NY
2021

Relevant Courses: *Software Engineering, Data Structures & Algorithms, Design and Analysis of Algorithms, Database Management, Distributed Database Systems, Data Mining, Big Data Management, and Artificial Intelligence*

COMPETENT SKILLS

- Software Development
- Software Development Lifecycle
- Android Development
- Teamwork and Leadership Skills
- Troubleshooting & Debugging
- Communication Skills
- Critical Thinking
- Organizational Skills
- Time Management

TECHNICAL PROFICIENCIES

Python (Django, OOP) | JavaScript (Angular, JavaScript) | HTML/ CSS | SQL (PostgreSQL, Oracle, MySQL, Firebase) | Java (OOP) Version Control (Git, Github) | Flutter/Dart | Linux

PROJECTS

App Development | Backend & Front End Developer

Jan 2020 - May 2020

- Built a responsive Android app with features including Food barcode Scanner, Nutrition information based off barcode using Android Studio.
- Collaborated with a cross-functional team on front-end and personally created and set up database to store data using MySQL.
- Worked closely with multi-disciplinary group including process engineering, tool design engineering, quality control, and reliability testing.

Technologies Used: *Android Studio, MySQL, and GitHub.*

App Development | Backend Developer/ UI

Sep 2020 - Dec 2020

- Built a responsive iOS & Android app with features including Events, Group Messenger, Food delivery/Takeout Service, and Profile Creation.
- Developed the Food Delivery/Takeout section of the app using incremental software development process. Set up and connected the back-end.
- Utilized Firebase for the Database, GitHub for version control and Jira for task management, distribution, and progress.
- Worked closely with the QA and Product Management teams as well as other developers to ensure quality software development.

Technologies Used: *Flutter/Dart, Firebase, GitHub, and Jira.*

MiniNet Project- Computer Networks | Developer

Jan 2020 - May 2020

- Built a basic network topology using MiniEdit GUI, a mesh topology w/ remote SDN controller, and a Denial of Service.
- Managed workflow and performed code reviews to promote best practices. Identified and troubleshot defects in the application.
- Participated in the full development cycle, end-to-end, from design, implementation, & testing to documentation, delivery & maintenance.
